

Waste Minimisation:

Issue:

Waste costs! Not only in terms of disposal fees, but also lost product, personnel time (e.g. administration, management, accounting, clean up), storage space and its environmental impact at its now 'resting place'.

As a wise environmentalist once put it 'Waste costs the earth!'

Expertise:

The following lists some of our projects on waste minimisation:

Pharmaceutical:

- Detailed waste audit of facility.
- Segregation strategy to minimise high temperature incineration quantities.

Building Material:

- Waste Audit.
- Recycling options strategy.

Chemical:

- Waste Audit.
- Improved trade waste compliance.

Timber/Food:

- Energy audits.
- Greenhouse gas calculations.
- Energy reduction strategy (3 year pay back).

Agri product:

- Prescribed waste advice.
- Packaging covenant advice.

Solution:

Begin your 'War on waste' with a detailed waste audit that aims to characterise the waste types and quantify their volumes/ amounts.

EnviroRisk Management has considerable waste auditing expertise and has available process and maintenance expertise to identify options to minimise wastage; be it solid, liquid, gaseous or energy.
